DUAL REBATED
HIGH PERFORMANCE
COMPOSITE DOORS

Why choose a Gallery Door?

When it comes to choosing the perfect door, there are several deciding factors that need to be considered:

Style and Elegance

Of course you want something that looks stunning and the Gallery Door delivers beauty and finesse in abundance. Available in a wealth of colours and with attractive door furniture and dazzling glass designs to compliment the door, you can rest assured that you will find a style that best suits your home.

Secured by Design

Official Police Security Initiative

Security

Gallery Doors have been subjected to PAS23 and PAS24 security testing under the Police recommended

Secured by Design standard. All Gallery Doors come with hook locks and compression rollers as standard so you and your loved ones are safe and secure behind your new Gallery door.

Environmental and Energy Considerations

Our doors are the thickest on the market today at 68mm front to back. That makes them some 55% thicker than the standard 44mm offered by other brands. This extra depth, along with the use of a high-density polyurethane foam core, substantially reduces heat loss by as much as 85% compared to traditional timber doors. That means superior thermal performance with a U-Value of just

0.85Wm²K on a solid door, while the timber free construction makes it more environmentally friendly. All this adds up to a more energy efficient composite door solution, keeping you and your family warm and saving you money on heating bills.

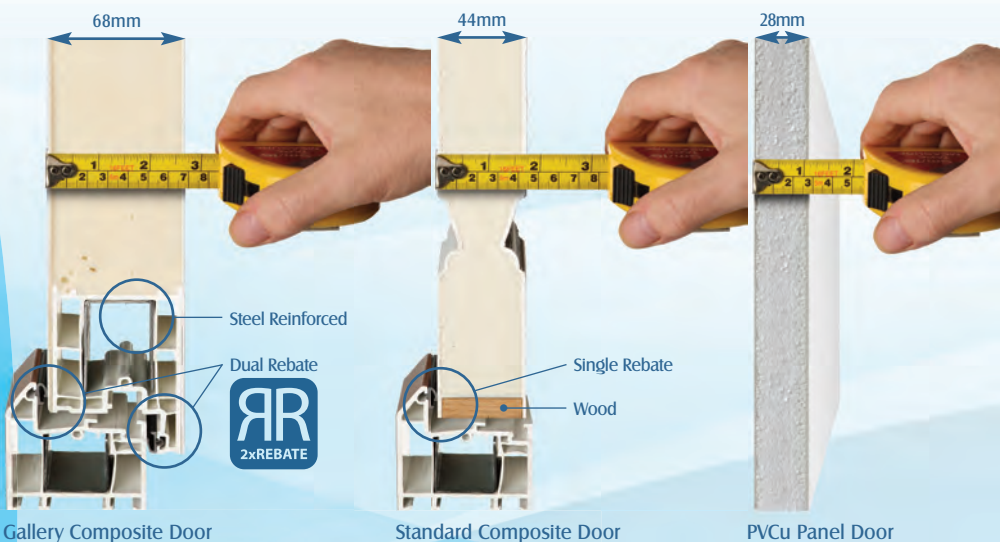

Made to Measure

Every gallery Door is made individually and built to fit your home. We don't buy in a container of doors and then shave a few mm's off here and there to make it fit. We take your individual measurements and build up the door from scratch to your specifications. The results are a perfect fit, first time, all the time and the knowledge that your Gallery Door was lovingly crafted just for you.

Can You 'Spot the Difference'

Gallery Composite Door

Standard Composite Door

PVCu Panel Door

The Gallery Door is a Composite door with a difference. Unlike many other common Composite doors, the Gallery range offer steel reinforced sections as opposed to wood. They are impressively sturdy with a 68mm thickness where lesser doors offer only 44mm. Gallery Doors are dual rebated. A rebate is essentially a deep groove that is cut into the edge of a door frame to allow a tighter fit. Thus, a single rebate is a frame that has one of these grooves, and a dual rebate is a frame that has more than one. Dual rebate frames are 55% thicker and offer the homeowner more security. So it's probably not that difficult a question...of course you can Spot the Difference!

Door Colours

Door Styles

Clermont

This classic four panel door design is probably our most popular style and would grace any home, being suitable for many decorative glass designs.

Decorative Glass Colour Options

The following decorative glass designs are available in a choice of colour options, allowing you to complement or contrast the glass design with your chosen door colour.

With the Crystal Bohemia, Crystal Diamonds/3-Drop Diamonds and Crystal Harmony designs, we recommend using a textured backing glass (see opposite).

Clarity Lead Options

With our Clarity decorative glass designs, you have the option to choose between genuine Brass or polished Zinc lead.

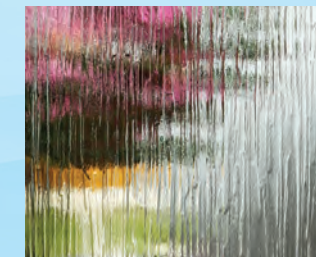

Backing Glass Options

With our Crystal Bohemia, Crystal Diamonds, Crystal Harmony, 3-Drop Diamonds and Fleur glass designs, we recommend a textured backing glass is used to add an extra level of privacy. You can also specify them for use with our Earle, Miller and Parkes door styles.
